Development Department

Memo. No. 56597 A III/48-3 dated 3-7-1948.

Sub: Agriculture - Grow More Food - Chemical Fertilizers - Ammonium Sulphate - Distribution as straight fertilizer by private firms - Proposals for the fertilizer year commencing from 1st July 1948.
Ref: From the D.A.No.M1.1213/48 dated 4-6-48.

The Government agree with the Director of Agriculture that the question of calling for tenders for the distribution of Ammonium Sulphate as a straight fertilizer for the fertilizer year 1948-49 may be taken up in September 1948. He is requested to come up to Government with fresh proposals in this regard in the first week of September 1948 without fail. He is also requested to get ready in the meanwhile all the preliminaries connected with the issue of the necessary tender notices with such modifications as may be necessary in the light of the experience so far gained.

2. The Legal Department have advised that the period of contract with each firm may be extended up to the period required by either making an endorsement on the original agreement or by executing a supplemental agreement amending the existing agreement, before 30-6-48. These suggestions cannot be carried out as the agreement for 1947_48 has not yet been executed, The only other course open is to enter into a separate agreement with each of the firm for the extra period. The Director of Agriculture is therefore requested to prepare draft agreements on the lines approved by Government for 1947-48 & submit them to Government for approval immediately, extending the contracts upto 30-9-1948 in the first instance.
